# RETRACTACTABLE SCREEN REMOTE CONTROL OPERATING INSTRUCTIONS

Notice

- Install motor terminal on the same side as power supply.
- Antenna should be as straight as possible. Position the antenna as far away from metal objects so that receiving distance is not affected.
- Please replace batteries of remote control or wall switch before the battery use up.

New Purchased Motorized Screen

For new purchased motorized screen, operate according to step I and step II to set the BOTTOM limit and TOP limit.

I. To set BOTTOM limit

1) Press "Limit" key on the remote control for 3 seconds until the motor produces three beeps of "Di-Di-Di". Release the "Limit" key, the motor is now in the limit setting status.
2) Press the "Down" key on the remote-control, the screen should go down. When the screen is close to the desired position of the down limit, press the "Stop" key on the remote-control.
3) Press the "Up" or "Down" key, to fine tune the BOTTOM limit location.
4) Press the "Confirm" key, when the motor produces three beeps of "Di-Di-Di", the setting is completed.
II. To set TOP limit

1) Press "Up" key on the remote control, the screen should go up. When the screen is close to the desired TOP limit, press the "Stop" key on the remote control.
2) Press "Up" or "Down" key to fine tune the TOP limit location.
3) Press the "Confirm" key, when the motor produces three beeps of "Di-Di-Di", the setting is completed.

New Remote Control

IF YOU lost the original remote control and need to replace with a new remote control, please operate according to the following steps.
III. Eliminate the original connection between remote control and motor

Press and hold the "Setting" key on the motor for 6 seconds, until the motor produces beeps of "Di-Di" and "Di-Di-Di-Di" release the "setting" key, the memory on the motor has been eliminated.

① ②

IV. Match the remote control with motor.

Press and hold the "Setting" key on the motor for 3 seconds, until the motor gives out sounds "Di-Di", release the "Setting" key, and press the "Confirm" key on the remote control before the "Di-Di" beeps stopped, the motor will vibrates and produces beeps of "Di-Di" , the setting is completed.

Keep pressing 3s
①

②

Release it
③

V. Adjust the motor running direction.

Press the "Up" key on the remote control.

a) If the screen moves up, that means the key and the motor match, no need to adjust, skip this step and go to (VI).

b) If the screen moves down: Press and hold the "Limit" key and "Stop" key for 3 seconds. When the motor produces three beeps of "Di-Di-Di" release both keys. The motor running direction has been changed.

TO TEST: Press the "Up" key on the remote-control, if the screen goes up, the setting is completed.

VI. Add wall switch controls

Press and hold the "Limit" key and "Confirm" key on the remote control for 3 seconds. When the motor produces three beeps of "Di-Di-Di" release both keys, and press the "Confirm" key on the wall switch before the "Di-Di-Di" beeps stopped, the motor will vibrates and produces three beeps of "Di-Di-Di", the setting is completed. Now screen can be operated by both wall switch and remote control.

Q & A

If screen do not operate, please check:

● Whether the power supply is connected properly and well tightened. If yes, the motor will produce the sounds "Di-Di-Di".

If the motor continues running, please check:

● If the motor continues running in one direction, go to step I and step II to set the limit.
