

EMBEDDED **LTE** CELLULAR DATA

Simple and cost-effective Cellular integration with WiFiRanger

LTE AVAILABLE ON

Sky4 LTE

Sky4 LTE Pack

SkyPro LTE Pack

ADD CELLULAR LTE TO WiFiRANGER FOR BEST OF BOTH WORLDS

The WiFiRanger LTE option provides integrated Cellular connectivity, making for an amazing internet-everywhere solution combined with the outdoor WiFi signal boosting capabilities of WiFiRanger products. Provide your customers with a rooftop-integrated Cellular option, improving signal reception and internet speeds with the LTE-equipped WiFiRanger intelligently optimizing the internet between WiFi and Cellular. The built-in LTE modem is multi-carrier, supporting Verizon, AT&T, Sprint, and T-Mobile. Simply add an active SIM from the desired carrier and change the modem configuration with the click of a button. A private WiFi network from the WiFiRanger then distributes the internet to all of the customer's wireless devices.

The LTE option is available with the standalone Sky4 LTE or bundled with an indoor Core router in either the Sky4 LTE Pack or SkyPro LTE Pack. All of these products provide the best of both Cellular and WiFi internet connectivity, ensuring the ultimate mobile internet experience for your customers.
