The know-how we have makes the quality run deep through all phases of Kountry Aire's construction. The aluminum exterior wraps around a reinforced framework and blankets of insulation to form strong, attractive units — a result of years of experience building top-of-the-line products.

Sidewalls
Sidewall studs, 2 x 2 every 16" are reinforced by belt rails and further strengthened with steel straps, making a completely durable framework. Batts of 2" insulation cover every area. Wiring is extra heavy duty, with steel wiring sleeves in the studs, and meets all codes.

A heavy plywood, center walkway and rear deck area are standard on a Kountry Aire. Rafters are heavy duty with 2 x 4 members every 16". Thick insulation gives a top blanket of comfort year around.
