The LIVING AREA - Flexsteel® sofa bed - Comfortable cushioned chair - TV cabinet with storage under - 2 large tinted windows with wood woven shades - Overhead storage above sofa.

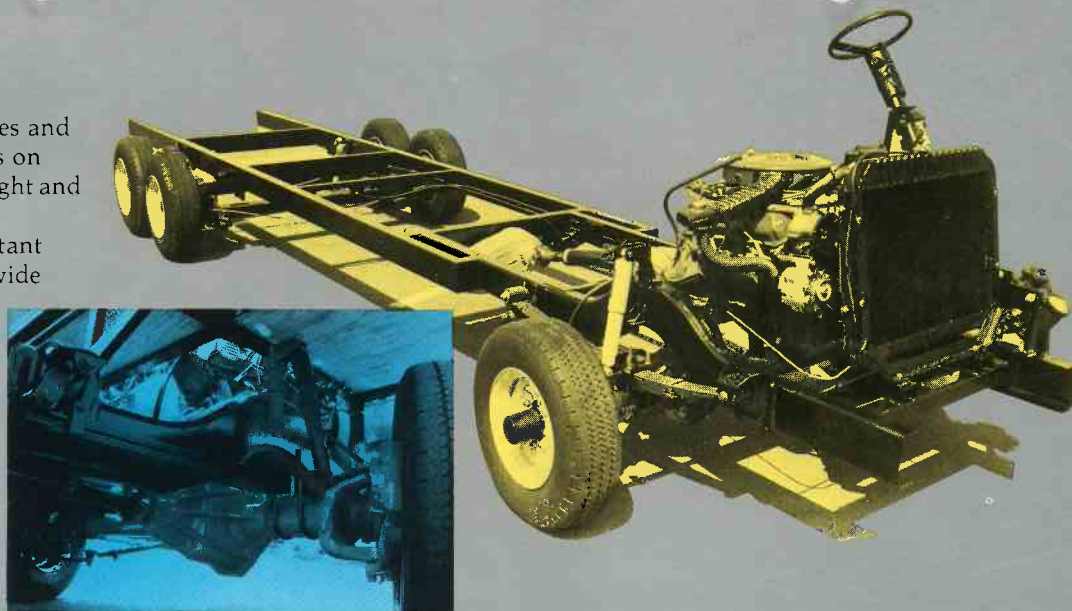

WOLVERINE FRONT WHEEL DRIVE CHASSIS WITH REAR WALKING BEAM TANDEM SUSPENSION

The Wolverine Front Wheel Drive Chassis is based on a decade of design, development, and manufacturing experience in front wheel drive motorhomes and commercial vehicle chassis. Its rugged dependability is the result of emphasis on simplicity of design and quality of construction. Featuring a low 22" frame height and an extra wide 52" frame, the chassis is custom tailored to London Aire's specifications. The 6000 lb. Dana steer-drive axle incorporates Con-Vel constant velocity, wheel ends, for smooth steering and power transmission. The 81" wide track assures maximum stability.

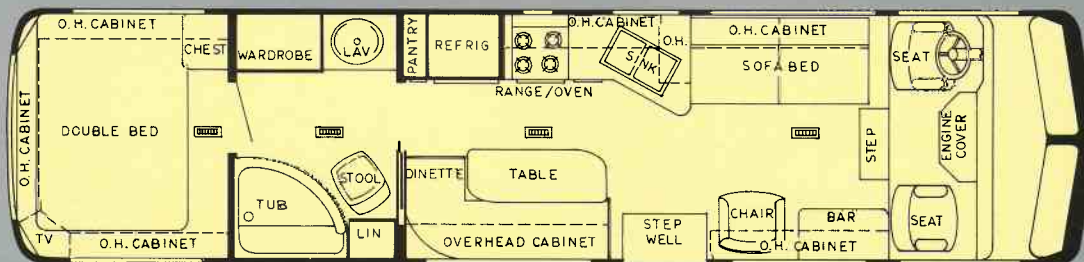

The RV-100 Henderson Walking Beam, tandem, rear suspension in conjunction with the Wolverine A-5500 drop axles has proven reliable in over 30 million miles of operation.

Power is supplied by your choice of a Ford 460 CID gasoline engine or the 6.9 liter Ford Diesel engine (Spring 1983)

TRUSS-TYPE CONSTRUCTION

The London Aire walls and roof feature a completely welded, truss-type aluminum superstructure. A heavy .030, baked-on enamel, aluminum exterior is riveted to the superstructure. Every exterior surface is fully insulated with R-7 fiberglass in the walls and floor, and R-14 in the ceiling. The unit's exterior has large, smooth, radius corners to give a handsome appearance and sound aerodynamic design.

The 33' London Aire Class A - Dry Wt, 12,400 lbs. - Overall length 33'6" - Wheel base 220"
