Newmar Corporation has been helping America relax in style for 26 years. Our tradition of elegance began when the first Kountry Aire was designed in 1967. Since then we've grown from tipouts to slideouts, from one brand to six and from manufacturing only towables to producing, Class A's and Diesel Pushers as well as Travel Trailers and Fifth Wheels.

As our life has changed over a quarter century, so has America – in 26 years our nation has grown from households with one TV set (often black and white) to full-blown color screens complete with VCRs and satellite dishes. We've watched a man walk on the moon. Technology has advanced to the point that computers have become household mainstays. And our lives have become so fast-paced that we've replaced personal banking with automatic teller machines, and homemade chicken soup with microwave boiling bags.

At Newmar, we've used technology to the fullest. Our innovations, such as perfecting the large slideout, have earned us industry-wide recognition as a manufacturer delivering the highest standards in the RV industry.

And while it's important for us to stay on the cutting edge of technology, some things at Newmar will always stay the same – things like our traditions of elegance, comfort and quality. Newmar still constructs each recreational vehicle with the old-world craftsmanship and attention to detail that have become our hallmark.

At Newmar, we're proud of the past 26 years and our sincere dedication to our customers. As we celebrate, we intend to keep serving you and providing you with the best products possible. After all, you're the reason we're in the business.
