WHEN YOU KNOW THE DIFFERENCESM

THE NEWMAR DIFFERENCE

Over the past 40 years, Newmar has created a heritage devoted to quality, innovation, luxury and Amish craftsmanship.

Newmar products incorporate sound construction principles, such as the leveled and squared chassis, sub-floor structure that is integrated and welded to the chassis rail and insulation that makes them easy to heat and cool. We use innovative technologies, which include Comfort Drive® Steering, a real-world wiring system, and we test and weigh each vehicle to make sure it meets our high expectations. We also provide custom-built touches, like our hand-crafted cabinetry. With Newmar, you get the ultimate in luxury from a company that's dedicated to its roots and stands for the utmost in quality.

A

NEWMAR TOTAL COMFORT™ CENTRAL AIR CONDITIONING

Experience RV air conditioning just like that found in site-built homes. Newmar's Total Comfort Central Air Conditioning is actually two separate, fully ducted systems: one to distribute incoming cool air, the other to quickly and effectively remove warm air from every living area.

PROTECTED C-CHANNELS

To keep the electrical wiring that runs through holes in the aluminum-frame C-channels from chafing, each hole is ringed with a plastic grommet.

SIKAFLEX®

Used throughout Newmar construction, Sikaflex elastic adhesive is one of the strongest bonding agents on the market today. It also serves as a sealant against air and water. And it helps dampen both sound and vibration.

16" ON-CENTER FRAMING

Just like a fine site-built residential home, your Newmar home is framed 16 inches on center, which allows the best placement of outlets, switches and other components.
