KING AIRE CONSTRUCTION

The Spartan® K3’s strong chassis with 20,000 lb. IFS (Independent Front Suspension) is the highest performing motor coach ever. Its tubular truss web frames and substructure beams form a foundation stable enough to allow extensive pass-through storage. This – and King Aire’s GVWR of 54,000 pounds, with a 14,000 pound tag axle – allows King Aire to expand beyond its chassis footprint, creating extra living space. Its Cummins® ISX 600 HP engine gives you incredible maneuverability and power, even on steep inclines.
