CONSTRUCTION & CHASSIS SPECIFICATIONS

LIKE A FINE HOME, Mountain Aire is framed 16 inches on center, allowing the best placement of outlets, switches and other components. Newmar uses only Sikaflex elastic adhesive throughout Mountain Aire's construction – one of the strongest bonding agents available. It seals against air and

water and helps dampen sound and vibration. Electrical wiring holes in Mountain Aire's aluminum frame are ringed with plastic grommets to protect wires from chafing. And Newmar's Total Comfort™ Central Air is two separate, fully ducted systems that distribute cool air and remove warm air.
