DESCRIPTION OF PROBLEM			
<p>Certain 2012 Essex and King Aire motor homes require an update to the Silverleaf system. Silverleaf has issued a new firmware version release V1.07 for the TM-250 AC Load Module.</p> <p>This is to correct a display issue with the outside temperature. When the outside temperature drops below 32 degrees F, the sensor has potential to error and the display goes to -459</p>			
RECOMMENDED SOLUTION			
<p><u>If this error is identified:</u> The following part below will need to be ordered from Newmar under this TSB #. The TM-250 module will be preprogrammed for each motor home. The original TM-250 module will need to be returned to Newmar.</p> <p>After the module replacement, the technician should push the features button on the front Silverleaf screen, then scroll down to the component versions to verify that the module is being read as a TM-250 v1.07.</p> <ul style="list-style-type: none">• Labor time: 0.4• Flat rate code: TSB 392• Newmar Part# 116090NR• Vendor Part# TM-250 Module Description AC Load Manager V1.07
