MODEL YEAR(S) AFFECTED

2016, 2017

TSB

486 **Amended**

MODEL

Bay Star Sport	☐	Ventana	☒	Essex	☐
Bay Star	☐	Dutch Star	☒	King Aire	☐
Canyon Star	☐	Mountain Aire	☐	New Aire	☐
Ventana LE	☐	London Aire	☐	Other	☐

DESCRIPTION

Newmar and MCD shade have determined that certain 2016 and 2017 Dutch Star coaches (all floorplans with **remote-controlled power shades**) and 2016 and 2017 Ventana coaches (4311 floorplan only) may experience **remote-controlled power shade** failures. MCD has created the attached troubleshooting instructions to diagnose the 14-channel remote and remote motors. If the original remote-controlled motor(s) have failed and currently need replacing, the motors and remote(s) will be replaced with a **15-channel remote, new remote control motors, and a two-channel bedroom remote. The driver side "Sway Shade" will also be replaced as a complete shade.** Replace the bezel in the wall to ensure the proper fit of the new 15-channel remote.

Affected Units: Refer to the attached population list for specific coach and VIN numbers that may be affected.

RECOMMENDED ACTION

Repair Procedure: Follow the attached troubleshooting procedure. If the shade motors have failed and currently need replacing, contact your Newmar Service Account Manager to obtain authorization to replace the shade motors and the remotes. In order to obtain the correct authorization time and order the correct amount of motors, it is necessary to know how many **remote-controlled shades** are in the coach and how many of those shades have two motors. **Do not include power shade motors operated by switches on the wall or dash in the quantity of necessary motors when you request authorization.**

Once the authorization is complete, the Newmar Parts Department can process the order for TSB 486. Follow the attached instructions to replace the motors, program and test the 15-channel and two-channel remotes, and set the **remote-controlled shade motor** limits.

NOTICE: When programming, you have 10 seconds between steps, or you will have to start over. If experiencing problems with the two-channel remote, make sure the battery is installed correctly.

Remote shade motor: Newmar part# 026389

Two-channel remote: Newmar part# 026389A

15-channel remote: Newmar part# 026389B (includes new remote bezel)

TSB 486 expires after 12 months of retail ownership.

Flat Rate Code: TSB 486

Labor Time: .7 per window

Please read this bulletin in its entirety prior to beginning any diagnosis or repairs.

REMOTE MOTOR TROUBLESHOOTING

SYMPTOMS

POSSIBLE CAUSE

REMEDY

Motor runs but stops every couple of inches

1. Lost memory
2. Failed motor

1. Reprogram using instructions
2. Replace motor with a new one

Motor will not move

1. Coach battery low or no power
2. Remote control battery low or dead
3. Shorted wire
4. Lost memory
5. Failed motor

1. Start coach and let it charge
2. Replace battery in the remote
3. Locate shorted wire and repair
4. Reprogram using instructions
5. Replace motor with new

Motor “clicks” when you try to operate up or down

1. Failed motor

1. Replace motor

TROUBLESHOOTING PROCEDURE FOR REMOTE CONTROLLED MOTOR

1. Verify the voltage applied to the motor. Voltage should be between 11.0 and 13.6 volts DC. The positive wire is identified by large lines on the insulation. If the voltage is low, charge the chassis or coach batteries and retry the motor operation. Voltage can be verified in the disconnect/butt splices in the shade motor wiring leads. Verify positive and negative voltage (both up and down directions) from the switch.
2. If the shade fails to move, attempt to reset the motor by pressing and holding the learning button. The motor should beep. If the motor does not beep, verify that the power is going to the motor. If power for the shade is not present, please correct the power problem.
3. Refer to the back of this guide and follow the directions to link the shade motor to your model of remote controller.
4. If a shade motor fails to link to the remote controller, try to use a spare button on your 14-Channel or 2-Channel remote controller. If the motor links to the remote controller on an alternate button, please contact MCD for assistance.
5. If the motor will not program to any button on any remote controller, the batteries have been replaced, and correct voltage has been verified, please contact MCD for assistance.

Directions for Setting Remote Controlled Shade Motor Limits

14-CHANNEL REMOTE

Directions to Link and Set Limits

If you do not have the two small holes drilled in the face of your 14-channel remote, the cover of the remote must be removed for Key 1 and Key 2 access.

- Select the button on the 14 channel remote you want to link the shade to.
- Start the motor beeping by holding the learning button at the shade until it just starts beeping, then release.
- Link with Key 2 on the Remote: While motor is beeping, press and hold Key 2 (left hand button) to link remote to the motor. A *Chirp* will be heard if successful. *NOTE: In rare cases, Key 1 will marry the remote to the shade. Try this only after several attempts are made using Key 2 above with no results.*
- Program with Key 1 on the remote: Press and hold Key 1 (right hand button) to get into the program mode. You will hear the motor *Chirp*.
- Confirming the upper and lower limits: Lower the shade with the **DOWN** button and manually stop it by pressing the **STOP** button where you want the lower limit to be set. Note: You can bump the shade up or down (1/2" at a time) once you stop the initial movement of the shade as it first travels up or down. This allows you to accurately set the limit where you want the shade to stop. When you have the shade positioned properly, press Key 2 to confirm that limit. A *Chirp* should be heard.
- Using the **UP** button, move the shade to the upper stop position and manually stop the shade by pressing the **STOP** button. Bump the shade up or down to position it correctly and, again, press Key 2. You are now out of the programming mode.
- Test the shade limits: start by pressing the **DOWN** button on the 14-channel remote and keep your finger near the **STOP** button. If the shade does not stop at the limit you set, stop it manually. If the shade stops at the limit properly, press the **UP** button and test the upper stop point. Again, Be sure to keep your finger near the stop button in case the limit is exceeded. If the upper and lower stop points work properly, you are done.
- *NOTE: If the shade goes UP when you push the DOWN button, you can easily change the direction of the motor by holding the STOP button for that shade and then pushing Key 1, together, until the motor Chirps. The motor should now be reversed. Test the shade to be sure it is correct.*

If you need to link the shade to the **All Night** or **All Day** button on a 14-channel remote, press the **All Night/Day** button on the remote. Hold the learning button on the shade you want to link until it just starts to beep and release it. Press Key 2 on the 14-channel remote to link to the remote. If the limits were set previously, those parameters are stored in the motor at the shade, so no more programming is necessary.

Note: If you need to clear a motor of all its limits, hold the learning button for that shade for three sets of a series of beeps. The series will sound like, "beep, beep, beep-beep- beep. All previous limits will now be removed and you MUST manually stop the shade.

To un-link a shade for either the 2-channel or 14-channel remote: hold learning button on the shade for 1 beep cycle (beep, beep, beep-beep-beep), you can then re-link to another button. The shade will un-link from all buttons (individual and all).

2-CHANNEL REMOTE

You must remove the face-plate of the 2-channel remote to access the two keys. Use a paper clip, toothpick or similar to push the Key 1 and Key 2 buttons.

Note: You may not be able to link a new shade motor with an old remote if the remote number is Model SF-012.

New Motor: New Remote

- Link the shade to the remote: Press the **UP** button, **STOP**, or **DOWN** button on the side of the remote you want associated with the shade you are going to link to.
- Start the motor beeping by holding the learning button at the shade until it just starts beeping, then release. Press and hold Key 1 on the 2-channel remote to link the shade to the remote. If successful, the motor will emit a *chirping* sound. The channel is now linked to the shade. Release Key 1.
- Go into program mode with Key 2: momentarily press the **STOP** button on the remote on the side you want to program, then press and hold Key 2 to get into the program mode until the motor *Chirps*, signifying that you are now in the program mode.
- Confirming the upper and lower limits: lower the shade with the **DOWN** button and manually stop it by pressing the **STOP** button where you want the lower limit to be set. *Note: You can bump the shade up or down (1/2" at a time) once you stop the initial movement of the shade as it first travels up or down. This allows you to accurately set the limit where you want the shade to stop. When you have the shade positioned properly, press and hold Key 1 to confirm that limit until a Chirp is heard, then release.*
- Using the **UP** button, move the shade to the upper stop position and manually stop the shade by pressing the **STOP** button. Bump the shade up or down to position it correctly and, again, press Key 1. You are now out of the programming mode.
- Test the shade limits: start by pressing the **DOWN** button on the 2-channel remote and keep your finger near the **STOP** button. If the shade does not stop at the limit you set, stop it manually. If the shade stops at the limit properly, press the **UP** button and test the upper stop point. Again, Be sure to keep your finger near the stop button in case the limit is exceeded. If the upper and lower stop points work properly, you are done.
- *NOTE: If the shade goes up when you push the DOWN button, you can easily change the direction of the motor by holding Key 2 and then pushing the STOP button for that shade, together, until the motor Chirps. The motor should now be reversed. Test the shade to be sure it is correct.*

If you want to link the shade to the **All Night** or **All Day** button on a 2-channel remote, momentarily press the **STOP** button on the side of the remote that you want to link the shade to. Hold the learning button on the shade you want to link until it just starts to beep and release it. Press Key 1 on the 2-channel remote to marry to the remote and hold until it *Chirps*. If the limits were set previously, those parameters are stored in the motor at the shade, so no more programming is necessary.

Note: If you need to clear a motor of its limits, hold the learning button for that shade for three sets of a series of beeps. The series will sound like, "beep, beep, beep-beep-beep-beep". All previous limits will now be removed and you MUST manually stop the shade. You now must also re-link the shade to the remote (see above instructions).

NEWMAR MOTOR REPLACEMENT PROCEDURES

1. Remove the four screws that hold the valance to the wall and then remove the valance.
2. Disconnect power from the shade.
3. Remove the shade by pressing the release tab on each mounting clip and remove the shade assembly.
4. Place shade on flat surface and remove the allen head set screw from the bracket on the motor end of the shade assembly.
5. Remove the motors and bracket by pulling outward on the bracket.
6. Remove the phillips head screws which hold the motors to the bracket.
7. Take your new/replacement motors and attach them to the bracket using the small phillips screws that came from the old motors.
8. Reassemble the shade by inserting the motor/bracket assembly back into the shade assembly.
9. Put the set screw back into the bracket and tighten.
10. Reconnect Power wire and snap shade back into the mounting clips.
11. Put valance back in place and secure using the four screws you removed earlier.
12. Please refer to the reprogramming instructions below.

15-CHANNEL REMOTE PROGRAMMING

Please read instructions and familiarize yourself with the remote before you begin

MOTORS WITH RED LEARNING BUTTON - Motor Jogs

Press and hold learning button for desired number of jogs then release.

1. **One Jog** = Pairing mode - press and hold for one jog then release.
2. **Two Jogs** = Disable shade - press and hold for two jogs then release - (Recover shade/motor by pressing learning button for one second then release).
3. **Three Jogs** = Reverse motor direction of travel - press and hold for three jogs then release.
4. **Four Jogs** = Factory reset - press and hold for four jogs then release.

SECTION 1 - To Pair A Remote To A Shade

1. Decide which channel on remote.
2. Press and hold learning button until shade jogs and beeps one time.
3. Press and release P2 on the remote (shade will jog) see Fig. 1.
4. Press and release P2 on the remote (shade will beep).
5. Press and release the up or down button (shade will jog and beep 6x).

SECTION 2 - Limit Setting Mode

1. Press and release P2 on the remote (shade will jog and beep one time).
2. Press the up button on the remote (shade will jog and beep one time)
3. Press and release P2 on the remote (shade will jog and beep four times) to confirm you are in limit setting mode.
4. Use the up or down button to move shade to desired upper/lower stop point (for fine tune adjustment press and release P2 while shade is moving) and press stop. Once you have shade at desired location press and hold the stop button

Note P2 is UP and STOP at the exact same time, the light will go around the remote 2 times fast when P2 is selected.

Fig. 1

until it beeps four times and jogs once. Shade will jog and beep one time to confirm limit is set.

5. If limits need to be adjusted after they have been set, please delete limits first (see next section), then start over at section 2.

SECTION 3 - Deleting Limits

1. Press and release P2 on the remote (shade will jog and beep).
2. Press the down arrow on the remote (shade will jog and beep).
3. Press and release P2 on the remote (shade will jog and beep 4 times to confirm all limits are deleted).

SECTION 4 - Setting Up All Day/All Night Channel

1. Select individual channel for the motor/shade that you want to add to an "All" channel.
2. Press and release P2 while on individual channel (shade will jog and beep).
3. Press and release P2 again on same channel (shade will jog and beep).
4. Select desired "All" channel and press and release P2 on that channel **within 7 seconds**. Shade is now controlled by its individual channel as well as the all day/all night channel (shade will jog and beep 7 times).

**Note: if shade fails to jog and beep 7 times then the shade may have timed out, start over at Step 1.*

WAIT 5 SECONDS BEFORE PRESSING ANY OTHER BUTTONS

SECTION 5 - Controlling Multiple Motors/Shades With A Single Channel

1. Start by pairing and setting limits on the first shade/motor (see section 1 and 2).
2. Press and hold learning button on first shade for two jogs and release. Motor will beep confirming that it has been disabled.
3. Move on to the next shade and repeat the above steps (using the same channel).
4. Once you have all shades/motors programmed, you will recover the disabled shades by pressing and releasing the learning button for about one second.
5. All shades should now work together.

SECTION 6 - Channel Name Editing Operation

1. Select the channel you want to edit.
2. Press Mode button on back of remote (the first letter of channel name flashes).
3. Press UP/DOWN button to select the desired letter or number after you have reached the desired letter or number, press Channel+ to advance to the next character.
4. After completing the name edit, press stop to save.

2-CHANNEL REMOTE PROGRAMMING

Please read instructions and familiarize yourself with the remote before you begin

MOTORS WITH RED LEARNING BUTTON - Motor Jogs

Press and hold learning button for desired number of jogs then release.

1. **One Jog** = Pairing mode - press and hold for one jog then release.
2. **Two Jogs** = Disable shade - press and hold for two jogs then release - (Recover shade/motor by pressing learning button for one second then release).
3. **Three Jogs** = Reverse motor direction of travel - press and hold for three jogs then release.
4. **Four Jogs** = Factory reset - press and hold for four jogs then release.

SECTION 1 - To Pair Remote To A Shade

1. Decide which channel on remote.
2. Press and hold learning button until shade jogs and beeps one time.
3. Press and release P2 on the remote (shade will jog) see Fig. 1.
4. Press and release P2 on the remote (shade will beep).
5. Press and release the up or down button (shade will jog and beep 6x).

UP and STOP simultaneously=P2

(Do Not hold for more than 2 seconds)

Note P2 is UP and STOP at the exact same time, the light will go around the remote 2 times fast when P2 is selected.

Fig. 1

SECTION 2 - Limit Setting Mode

1. Press and release P2 on the remote (shade will jog and beep one time).
2. Press the up button on the remote (shade will jog and beep one time)
3. Press and release P2 on the remote (shade will jog and beep four times) to confirm you are in limit setting mode.
4. Use the up or down button to move shade to desired upper/lower stop point (for fine tune adjustment press and release P2 while shade is moving) and press stop. Once you have shade at desired location press and hold the stop button until it beeps four times and jogs once. Shade will jog and beep one time to confirm limit is set.
5. If limits need to be adjusted after they have been set, please delete limits first (see next section), then start over at section 2.

SECTION 3 - Deleting Limits

1. Press and release P2 on the remote (shade will jog and beep).
2. Press the down arrow on the remote (shade will jog and beep).
3. Press and release P2 on the remote (shade will jog and beep 4 times to confirm all limits are deleted).

SECTION 4 - Controlling Multiple Motors/ Shades With A Single Channel

1. Start by pairing and setting limits on the first shade / motor (see section 1 and 2).
2. Press and hold learning button on first shade for two jogs and release. Motor will beep confirming that it has been disabled.
3. Move on to the next shade and repeat the above steps (using the same channel).
4. Once you have all shades/motors programmed, you will recover the disabled shades by pressing and releasing the learning button for about one second.
5. All shades should now work together.
