Inspecting the WiFi Ranger Power Supply

If the WiFi Ranger power supply looks like this, proceed to the recall procedure instructions.

If the power supply does not, call a Newmar Service Account Manager to obtain authorization for inspection only.

Recall Procedure

1. Remove the affected power supply by disconnecting the power wires from the red and black pigtail wires; they are normally white with a black stripe and black with a white stripe. Do not cut both wires at the same time or allow them to become shorted, as blown fuse(s) will result.
2. Strip the wire insulation back approximately 3/8" and hook up the white wire with a black stripe to the V- terminal of the new power supply and tighten securely.
3. Strip the wire insulation back approximately 3/8" and hook up the black wire with a white stripe to the V+ terminal of the new power supply and tighten securely.
4. Mount the power supply in place of the old one.

5. Plug the round DC plug into the WiFi Ranger box.
6. Verify that the new power supply is supplying power to the WiFi Ranger.
7. Return the old part to Newmar.
