Relocating the Toll Module on Early-Production Super C Coaches Super Star (SSCC) and Supreme Aire (SACC) with Option 0J295

1. Remove the panel from inside the cabinet.
 - a. Note: The SACC panel may be smaller.
 - b. If the panel is damaged during removal, it may be necessary to replace the 3-square-foot panel (24 1/4" x 10"). The panel will need to be cut to fit the exact opening.

2. The original placement of the toll module is on the vertical flat surface directly behind the metallic Newmar logo. Remove the toll module from this location.
3. Reinstall the module higher on the slanted surface between the window and the Newmar logo (refer to the photos below).
4. Clean the new location area with a non-residue solvent or alcohol prior to reinstalling the module with new 3M double-sided tape.

5. Reinstall or replace the panel, and secure it using the correct amount of screws (6 screws on SSCC, 4 screws on SACC) to provide a removable panel for access.
