TECHNICAL SERVICE BULLETIN

AFFECTED MODELS

2020 – 2021 :: Ventana, Dutch Star

DESCRIPTION

Awning support brackets may not be mounted in the correct location to provide the proper support needed for the Girard center arm. Awnings with a length of 18 feet and under will not be affected because they do not have a center arm.

ISSUE

When the center support bracket is mounted in the incorrect location, it may allow the Girard awning to flex causing adjustment issues.

UNITS AFFECTED

Please refer to the attached population list for affected unit numbers and VINs.

CORRECTIVE ACTION

Follow the attached work instructions to inspect and, if needed, add support brace(s).

AUTHORIZATION AND PARTS NEEDED

Inspect the coach to verify support is necessary. Some coaches may not need any additional support, while others may need one or two supports. Contact your Service Account Manager to obtain authorization based on inspection, and order parts if needed. The parts list for a single brace is included in the attached work instructions. If the support(s) are necessary, order all of the parts through the Newmar Parts department.

FLAT RATE CODE: TSB 558

LABOR TIME: .1 hr. for inspection only

1.5 hr. for inspection and support bracket installation

NOTE

The center support arm mount must be at least 50% on the support bracket or an additional support must be added.

IMPORTANT: Please read this bulletin in its entirety prior to beginning any diagnosis or repairs.

NOTICE: Any technical information published in this bulletin is intended for use only by a qualified, Newmar-authorized service technician. Newmar is not responsible for the misuse of this information.

Work Instructions for Adding Support to a Girard Patio Awning with a Misaligned Center Bracket

This article provides work instructions (TSB 558) for adding support to a Girard patio awning that has a center bracket out of alignment with the recommended center arm position.

Check

Verify the location of the center arm to see if the roof-mounted Girard bracket is mounted behind the arm mount on all patio awnings installed on the coach. If the bracket is behind the arm placement, no further support is necessary. Awnings 18 feet and under do not have a center support arm, so no additional support is needed on the shorter awnings.

Issue

If the bracket is not behind the arm placement, it may lead to ineffective adjustments, a sagging arm, and/or flex or warping of the Girard case where the bracket placement was intended to be. If the bracket is not behind the arm placement, follow the instructions below to add the necessary support structure.

Necessary Parts

Description	Newmar Part #	Quantity	Unit of Measure
Powder Coated C-Channel	031542	1	each
Powder Coated Left Bracket	031524	1	each
Powdered Coated Right Bracket	031525	1	each
Girard Bracket (11-7/8")	031637	1	each
ABS Shim (1/2" x 2-7/8" x 11-7/8")	102346S	1	each
Bolt (7/16" x 1-1/2")	41826	.002	each
Flat Washer (7/16")	12021	.002	each
Lock Nut (7/16")	146234	.002	each
Bolt (3/8" x 1")	25779	.010	each
Lock Nuts (3/8")	31081	.010	each
Flat Washer (3/8")	12019	.006	each

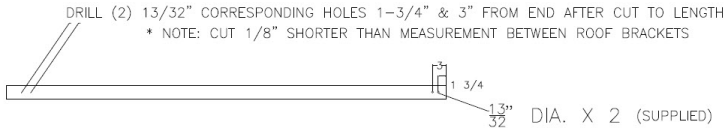

Procedure

1. Measure the distance between the two existing awning brackets (forward and behind where the arm placement is), and record each measurement.
2. Measure the distance from one awning bracket to the arm placement, and record the measurement.

3. Cut the C-channel 1/8" shorter than the distance between the brackets (make sure to cut excess off the end of the C-channel with only one hole), and touch up the cut end with black spray paint.
4. Match the channel and bracket, and mark the hole locations. Drill two 13/32" holes at the cut end (they should be approximately 1 3/4" and 3" near center of the C-channel).

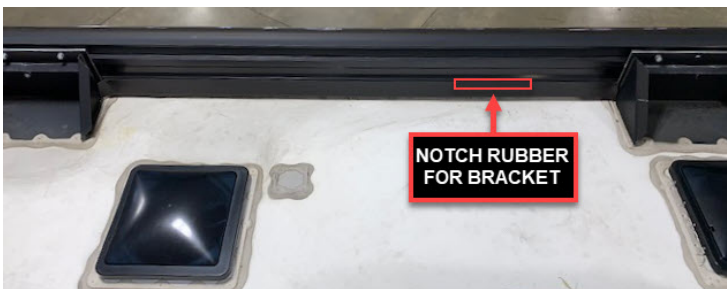

3" STRUCTURAL C-CHANNEL

5. Measure and mark the location of the awning arm on the C-channel. Place the new bracket that was supplied with the kit on the C-channel, and mark the mounting holes. Note: Keep the holes toward the top of the C-channel. The bolts will be near the top flange of the C-channel, but make sure they are low enough for the nuts to fit on the bolt.
6. Drill the 7/16" holes through the C-channel and 1/2" ABS spacer.
7. Secure the bracket and shim to the C-channel using 7/16" x 1 1/2" bolts, flat washers on slotted side, and lock nuts.

8. Secure the right and left end brackets to the C-channel using 3/8" x 1" bolts with a flat washer on the slotted side of the support bracket and lock nuts, leaving the lock nuts loose enough for the bracket to move slightly for now.
9. Notch the rubber where the new Girard bracket (mounted on the C-channel) will be placed, so it can engage and mate in the back of the Girard casing.

10. Place the assembled support brace between the awning brackets while making sure the bracket mounted to the C-channel hooks up into the Girard case.

11. Clamp the support assembly in place at each end while drilling holes. (It may be helpful to have two people during this part of the process, but it is not essential.)
12. Drill one hole at the top on each end and one hole in the slotted area to mount the support to the brackets. Put one bolt and nut in each hole, but only tighten them enough to allow the support bracket to pivot (use flat washer on slotted hole only).
13. Using a large crescent wrench on the bottom lip of the C-channel, apply pressure on the support bracket by pushing out toward the awning case. While applying pressure, tighten the two bolts that were placed in prior steps, and repeat this step at each end.
14. Drill and install the last bolt on the support for each bracket, and install the last bolt and nut on each end.
15. Make sure all the bolts have been tightened in the C-channel and brackets. Torque the bolts:
 - 7/16" bolts to 37 ft. lbs. for grade 5
 - 3/8" bolts to 23 ft. lbs. for grade 5

15. Adjust the center awning arm as needed by following the procedures provided by Girard's service manuals. Articles on Adjusting Pitch and Elbow Height on Girard awnings can also be found in Newgle.
