TECHNICAL SERVICE BULLETIN

AFFECTED MODELS

2023 :: Bay Star Sport, Bay Star, Canyon Star

DESCRIPTION

Several coaches built after 2023 ECO 300 (before the issue was discovered) may not have the charge wire hooked up properly between the battery isolation module located in the PDC box in the front passenger side bay and the front Newmar fuse panel located under the driver's side dash on the wall.

ISSUE

Without this wire hooked up to the F8 fuse at the fuse block, the house batteries may not charge while driving.

UNITS AFFECTED

Please refer to the attached population list for affected units and VINs.

CORRECTIVE ACTION

Follow the attached instructions to inspect and reroute the wire if necessary. Call your Newmar Service Account Manager to increase the time to .8 hr. and to order parts if a repair is necessary.

PARTS NEEDED

Item Description	Quantity	Newmar Part #
Disconnect 16-14g female spade blue	1 ea.	107187
Fuse, 7.5 ATC	1 ea.	107165
Conduit flexible ¼"	If needed	138810
Wire tew 16-1 blue w/white	If needed	20905

FLAT RATE CODE: TSB 602 **LABOR TIME:** .1 hr. for inspection, .8 hrs. for inspection and wire rerouting

IMPORTANT: Please read this bulletin in its entirety prior to beginning any diagnosis or repairs.

NOTICE: Any technical information published in this bulletin is intended for use only by a qualified, Newmar-authorized service technician. Newmar is not responsible for the misuse of this information.

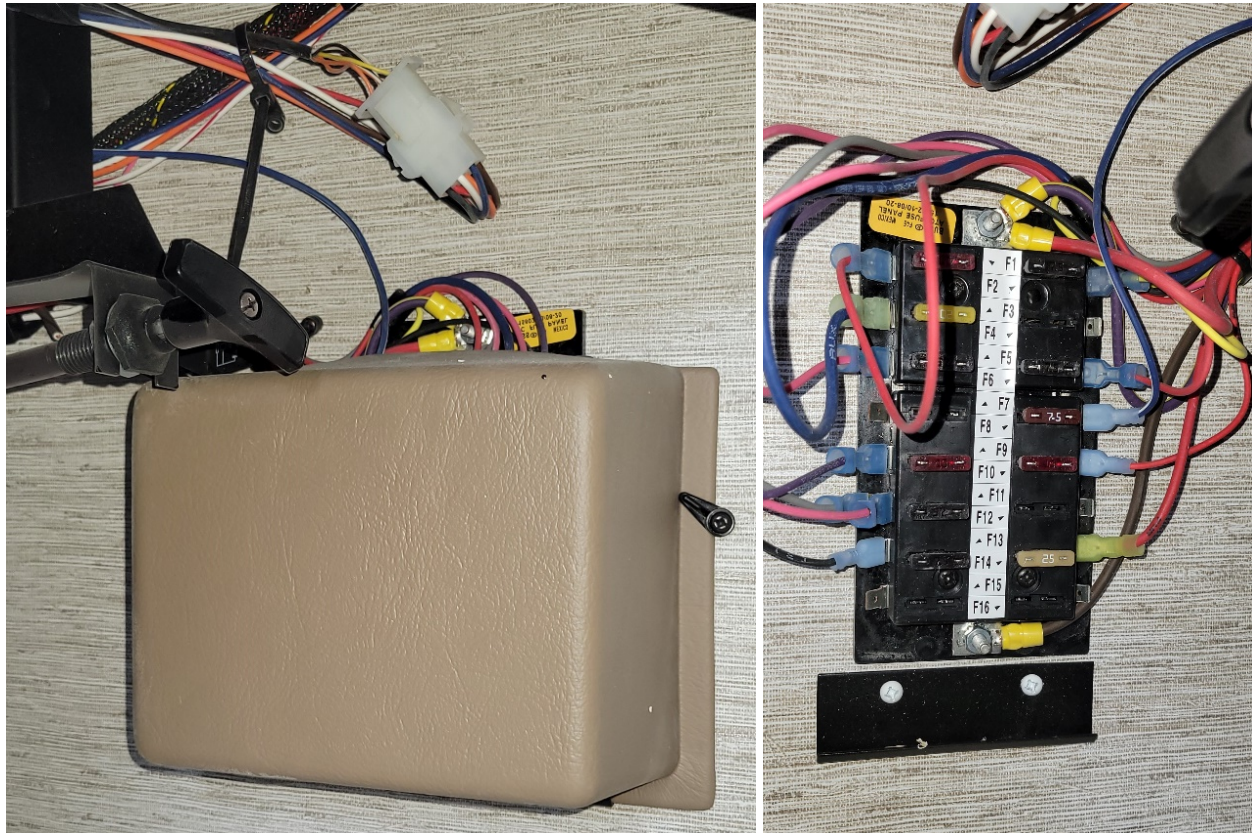

Instructions for Checking and/or Hooking Up a Charge Wire

The 16 ga. blue wire with a white stripe running between the battery isolation module and the Newmar fuse panel (F8) under the driver side of the dash may not be hooked up.

The wire runs through the wire loom hole in the front firewall near the center of the hood opening, and then inside the coach across the dash to the driver's side. The line should have been hooked up to the terminal (F8) with a 7.5-amp fuse installed. At the time of production, in many cases, the wire was mistakenly run back out through the firewall at the top driver's side under the dash and then up into the driver's side a-pillar.

Remove the fuse box cover and inspect:

- If there is a blue wire with a white stripe on the terminal for F8 and the 7.5-amp fuse is in place in F8, reinstall the cover. Do not proceed with the remaining work instructions.
- If the F8 fuse terminal is empty, proceed with one of the processes outlined below.

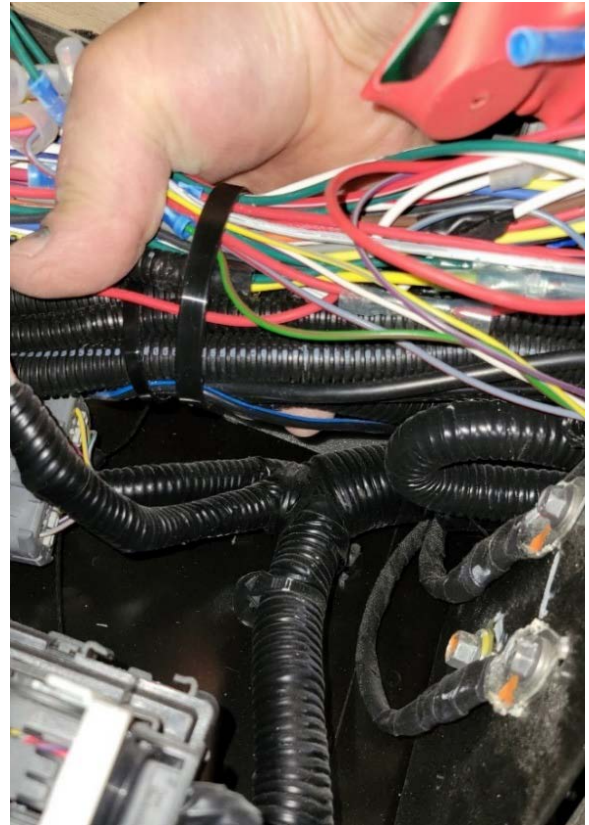

Bay Star / Bay Star Sport

Option 1 (Method used at Newmar)

With a flashlight and something to cut the zip tie (such as diagonal pliers) handy, lay down under driver's side dash, and locate the loom at the top driver's side of the dash going through the firewall. Look for a 16 ga. single blue wire with a white stripe (located in a small loom by itself).

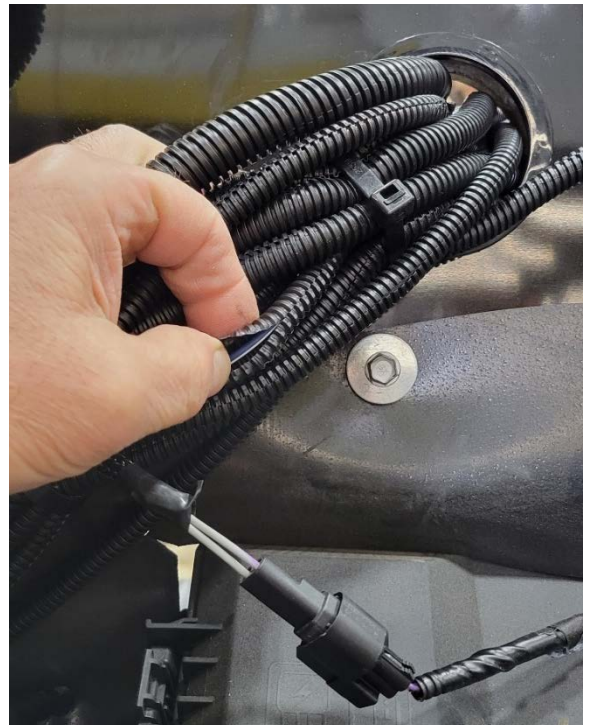

Once the wire is located, in most cases, it can be pulled back through the firewall out of the a-pillar. It may be necessary to cut a couple of wire ties to separate the wire looms to find the correct loom containing the blue wire with a white stripe.

Cut to length, strip, and install female spade terminal on F8 terminal, and install 7.5 ATC amp fuse. Zip-tie any bundles of wires you removed zip ties from and secure the wire running to the fuse box as needed.

Option 2

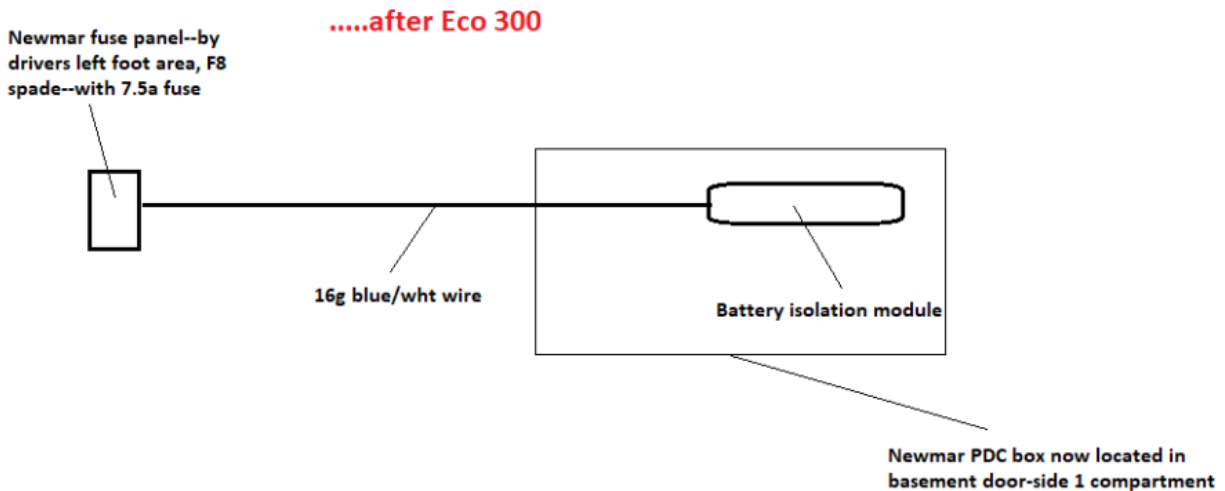

With the hood open on the outside of the coach, locate the wire where it first enters the firewall. Cut the wire and splice on the new piece, running the new section of the wire to the F8 fuse on the fuse block (it would be in its own loom here also, as pictured). Loom and tie up wire as needed.

Option 3

Pull the a-pillar and find the wire, loosen, and reroute it to the fuse block, lengthening it if needed. Route it down to the fuse block and loom/secure as needed. (No photo shown.)

General Note: Do not spend a bunch of time digging for this wire, as it is not that difficult to find. If you can't find it in one spot, check in one of the other spot(s). Remember the blue wire with a white stripe is the only wire in the small loom.

Testing: After the blue wire with a white stripe is hooked up, you should be able to test the house battery voltage and verify the house batteries are charging with the engine running. Remember: the charge conditions must be met for charging to occur.

Canyon Star Front Diesel

Look on the driver's side in the engine door. You may find it coiled up by the firewall under the dash by the front corner. It will still be a single wire in a small loom by itself.
