TECHNICAL SERVICE BULLETIN

AFFECTED MODELS

2022 – 2024 :: Supreme Aire, New Aire, Mountain Aire, London Aire, Essex, King Aire

DESCRIPTION

Newmar working with Xantrex has discovered some Freedom SW 3012 units experience a communication lock-up on the Xanbus network.

ISSUE

Once locked up, the user must manually reset the inverter to bring it back online on the network. This issue does not affect the electrical functionality of the unit, but the unit cannot be controlled via Xanbus. Xantrex has requested this firmware update be performed on all coaches on the population list, whether the customer is or isn't complaining about system lockup.

UNITS AFFECTED

Please refer to the attached population list for affected units and VINs based on information provided by Xantrex.

CORRECTIVE ACTION

Check the Xantrex firmware version to verify the inverter(s) have a version less than 3.15. This can be viewed from the SilverLeaf touchscreen by pressing the gear icon (Settings) and scrolling to and selecting the System Component List. Follow the attached Xantrex Technical Service Bulletin work instructions to complete the firmware update to version 3.15.

PARTS NEEDED

Item Description	Quantity	Newmar Part #
Firmware Update Tool Kit	1 Kit	037780

FLAT RATE CODE: TSB 606 **LABOR TIME:** .25 hr. per coach with up to two inverters

NOTE:

The dealer will be charged for the firmware update tool kit. Once the kit is returned, they will be credited for the cost of the kit. The kit needs to be used and returned in a timely manner to be sent out again to update other coaches. The flat rate time has been determined by Xantrex and verified by Newmar.

IMPORTANT: Please read this bulletin in its entirety prior to beginning any diagnosis or repairs.

⚠ DANGER

RISK OF FIRE, ELECTRIC SHOCK, EXPLOSION, AND ARC FLASH

This Technical Service Bulletin is in addition to, and incorporates by reference, the relevant product manuals for the Freedom SW device. Before reviewing this Technical Service Bulletin you must read the relevant product manuals. Unless specified, information on safety, specifications, installation, and operation is as shown in the primary documentation received with the product. Ensure you are familiar with that information before proceeding.

Failure to follow these instructions will result in death or serious injury.

NOTICE

EQUIPMENT DAMAGE

- Do not connect an Ethernet cable from the Conext ComBox to the WAN/MODEM port on the network router.
- Do not connect an Ethernet cable plug into a Xanbus port on the Conext ComBox.

Failure to follow these instructions can result in equipment damage.

Freedom SW Firmware Upgrade via ComBox Procedure

Required Tools

- Conext ComBox for Freedom SW (PN: 809-0918)
- Network router. The coach network router can be used, if available.
- Laptop with access to the same network as the Conext ComBox. Refer to the section below for more details.
- Ethernet cables, ideally CAT5 (or CAT5e at least). Quantity depends on the network setup.
- Two network terminators, 120-ohm
- USB Drive Formatted FAT32, 1GB+, Recommended Brands: SanDisk (3.0+), Vital (3.0+), Kingston (3.0+)

Before connecting a computer and router to the Conext ComBox, make sure it meets the following prerequisites.

- Router** The network router must be able to supply Dynamic Host Configuration Protocol (DHCP) addresses automatically to connected devices. If your network router does not support automatic DHCP, refer to your network router's user guide or contact your system administrator.
- Operating System**
- Microsoft® Windows® 7 (recommended) or later
 - Microsoft® Windows XP® (SP2, SP3)
 - Windows Vista® X86
 - Mac OS® X 10.4.8. or later
- Web Browsers**
- Mozilla® Firefox® 12.x or later
 - Microsoft® Windows® Internet Explorer® 8.x or later
 - Google Chrome™ 18.x or later
 - Safari® 5.x or later
 - Android 4.0 or later (Ice Cream Sandwich)

Establish a Network Connection Between All Devices

NOTE: The computer and network router may remain powered at this stage in the process. If not already powered, make sure these two devices are on before proceeding. The purpose is to have the computer and the Conext ComBox be on the same network.

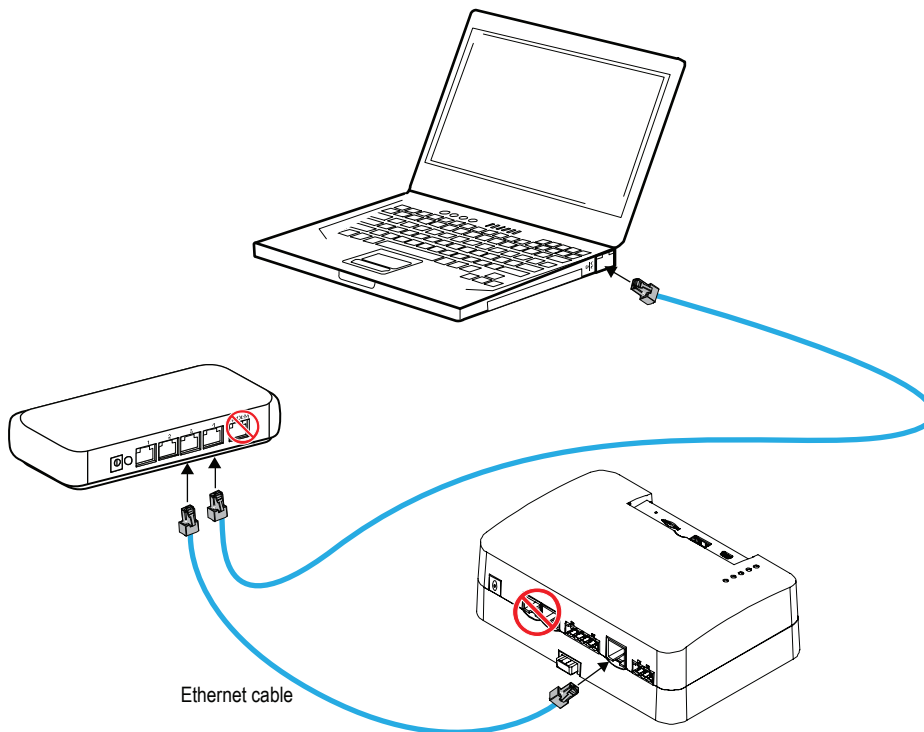

Connect the Conext ComBox and the computer using either step 1 or step 2:

1. Using the existing home / work / company network which has a DHCP server:
 - a. Connect an Ethernet cable from the 10/100 Ethernet port of the Conext ComBox to an available network port on the pre-existing network.
 - b. Connect the laptop to the same pre-existing network, this can be done via Wi-Fi, or a wired connection with another Ethernet cable.

NOTE: There is now a network connection between your laptop and the Conext ComBox.

2. Using a network router that has a DHCP server to establish a LAN (Local Area Network) allowing the PC to communicate with the Conext ComBox:
 - a. Set-up a router with DHCP enabled. Turn on the router.
 - b. Connect an Ethernet cable from the 10/100 Ethernet port of the Conext ComBox to an available LAN network port on the network router.
 - c. Connect the laptop to the network router with another Ethernet cable onto the LAN network port.

NOTE: There is now a network connection between your laptop and the Conext ComBox.

Connect the Conext ComBox and the Freedom SW unit:

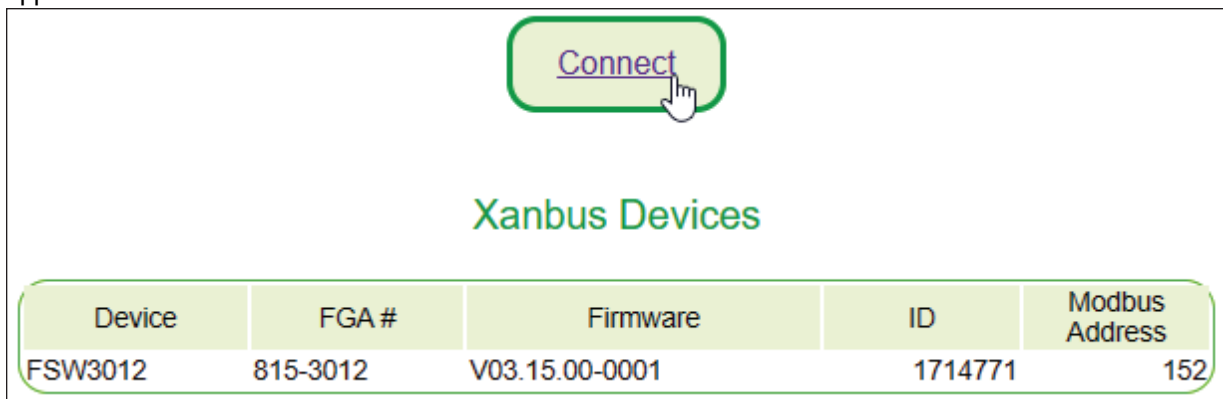

3. Plug in a network terminator to a vacant Xanbus port on the Conext ComBox.
4. Disconnect all Xanbus cables from the Freedom SW unit intended for this upgrade.
5. Plug in a network terminator to a vacant Xanbus port on the Freedom SW unit intended for this upgrade.
6. Connect an Ethernet cable between the Freedom SW unit to the other vacant Xanbus port on the Conext ComBox.
7. Apply power to the Conext ComBox by plugging the AC/DC power adapter into an AC wall outlet.
8. Apply power to the Freedom SW unit intended for this upgrade.

Installing the Freedom SW Upgrade

You can upgrade firmware for the Freedom SW from a computer connected to the same network as the Conext ComBox. Your Web browser may not support the upgrade function. Use Chrome 18.x or later, IE 10.x or later, Firefox 12 or later, or Safari 5.x or later for Conext ComBox upgrades.

To install upgrades for Freedom SW connected to the Conext ComBox:

1. To connect to the Conext ComBox via a web browser:
 - a. Insert an empty and properly formatted USB thumb drive into the Conext ComBox's USB Host port while the Conext ComBox unit is powered on (the Power LED is steadily on and not flashing).
 - b. Watch the Memory LED and wait for it to flash quickly five times.
 - c. Remove the USB thumb drive from the USB Host port.
 - d. Plug the USB thumb drive into your computer's USB port.
 - e. Use the file system browser on your computer to navigate to the thumb drive's root directory.
 - f. Look for a file named serial number.**.html**, where serial number is the Serial Number of the Conext ComBox.
 - g. Double-click the serial number.**.html** file. Your default web browser will launch and display the System Information screen.
 - h. Click the Connect button. The web browser opens and the Conext ComBox web interface Login window appears.

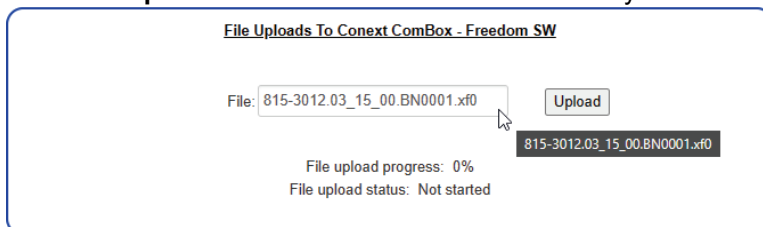

2. Log in to the ComBox web user interface with your user name **admin** and password **password**.

3. Click  in the menu bar.

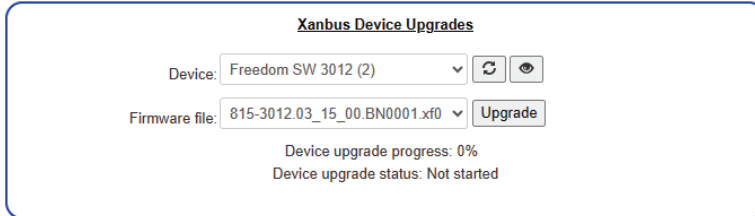

4. Click  in the left side menu.
5. In **File Uploads to Conext ComBox – Freedom SW**, click the “Click to select...” area to select the **815-3012.03_15_00.BN0001.xf0** file from the USB thumb drive.
6. Click the “**Upload**” button. Once the file is successfully transferred to the Conext ComBox, proceed to the next step.

7. In **Xanbus Device Upgrades** section, select your current device. Your Freedom SW should already be selected (the number in brackets in the device name “Freedom SW 3012 (2)” represents your device instance).

8. In Device, click  to load the latest list of devices.
- Select the Device you want to upgrade from the drop-down list.
 - You can click  to confirm you have selected the device you want. When you click the icon, some type of visual and/or audio indicators on the selected device will flash.

- In Firmware file, select the **815-3012.03_15_00.BN0001.xf0** file for the device upgrade.
- Click Upgrade.
- Device upgrade progress is indicated in percent and Device upgrade status is OK when the upgrade has completed successfully.
- If the upgrade is complete, return the Freedom SW unit to its original operating state. Verify that the Freedom SW unit has updated to the latest version (3.15) via your preferred method.
- If the device upgrade is not successful, click Upgrade again to retry.
If the device upgrade is successful, label the unit with a colored dot sticker and identify the firmware version on the dot sticker.
- If you have another Freedom SW unit to upgrade, restart the process from *"Connect the Conext ComBox and the Freedom SW unit:" on page 2*. Ensure the Ethernet cable is connected between the Conext ComBox's XanBus port and the new Freedom SW unit's XanBus port to be upgraded, and that a terminator remains on the Conext ComBox and on the new Freedom SW unit as well.

If the upgrade is unsuccessful follow the steps below:

- Do a power cycle of the Freedom SW that is being upgraded.
 - Remove AC and DC power from the Freedom SW.
 - Wait at least 10 seconds.
 - Re-apply AC and DC power to the Freedom SW.
- Then, click Upgrade on the web interface.
