DESCRIPTION OF PROBLEM							
Fuse size used on electric step.							
RECOMMENDED SOLUTION							
Please refer to the new fuse sizes per the attached notice from Kwikkee step.							

# NEWMAR CORPORATION WARRANTY DEPARTMENT

**TO: All O.E.M.'s**  
**FROM: Kwikkee Products Company**  
**NOTICE: CHANGE IN SIZE OF FUSES INSTALLED ON ALL ELECTRIC STEPS**

We are making a change in the size of the fuses that need to be installed on all electric steps.

The previous sizes are as follows:

- For the 10 gauge red wire, 25 - 30 amp.
- For the 16 gauge white wire, 1 - 8 amp.
- For the 16 gauge yellow wire, 1 - 8 amp.

The new fuse sizes to be used are as follows:

- For the 10 gauge red wire, 25 amp is strongly recommended and a 30 amp is the maximum.
- For the 16 gauge white wire, 5 amp maximum.
- For the 16 gauge yellow wire, 5 amp maximum.

These changes are designed to better protect the control unit and motor on the electric steps. They are being recommended by our vendors and also from input received from other sources. We would expect that compliance with these guidelines be completed by model year change in 1996. Earlier compliance would be appreciated.
