☒ Chassis Components	☐ Plumbing & Bath Components																
☐ Construction Components	☐ Windows, Awnings, Vents, & Doors																
Description of Problem																	
Upward forces generated by the air spring may cause the lower end of the upper spring tower to pull away from the main cradles mounting plate. This creates the potential for the upper spring tower mounting fastener failure and the possible subsequent failure of the upper spring towers ability to maintain control over the upper spring position.																	

Newmar Corporation Warranty Department

Recommended Solution
Inspect condition of the upper spring towers; Replace if necessary. Weld upper spring towers to the main cradle. See manufactures attached repair directions. Contact manufacture directly for additional information or instructions.

Re: Notice of Campaign Service Bulletin: **CSB06-250-002**

Dear Valued Customer,

A recent decision was made to issue a Campaign Service Bulletin for certain motorhome models equipped with an IFS84 Ridewell Front Suspension and having a VDM (Vehicle Date of Manufacture) of January 27, 2004 through September 20, 2005. A condition exists where the upward forces generated by the air spring may cause the lower end of the upper spring tower to pull away from the main cradle's mounting plate. This creates the potential for upper spring tower mounting fastener failure of the upper spring tower's ability to maintain control over the upper spring position. 4.5 hrs labor is allowed per side to replace the upper spring tower. 2.5 hrs is allowed to weld both spring towers to the main cradle.

Please note:

The Vehicle Identification Number that is affected by this campaign is on the address label that is on the front of the envelope this letter was contained in.

Your satisfaction with our product is important to us. We are initiating this contact with you so that you will, at your earliest opportunity, take your vehicle in for service. In doing so, we can be certain that you have the best product available for optimal performance.

Carefully follow the instructions below:

Contact Spartan Chassis Customer Service 1-800-393-8861 (option 6); have last 5 digits of your VIN (Vehicle Identification Number) available. This is listed on the upper left portion of the address label. A Spartan representative will advise you as to what your vehicle requires.

Although **this is not a recall**, Spartan Chassis is committed to serving you with your best interests in mind.

Best Regards,

Wayne Ridge
