| DESCRIPTION OF PROBLEM | | | | | | |
| Ceiling panels loose and falling down. | | | | | | |
| RECOMMENDED SOLUTION | | | | | | |
| Find ceiling rafter 16" centers and cut the ceiling fabric with grain. Lay open the ceiling fabric to expose plywood backer. Drill pilot hole and counter sink plywood. Run counter sink head screw 1 1/2" in length into rafter. Do not make screw too tight or it will make an indentation in the ceiling panel. Apply small amount of adhesive to plywood and press ceiling fabric back in place. | | | | | | |
